

- **Overwhelming scientific evidence and published medical research documents the role that essential nutrients play in achieving and maintaining good health.**
- **This same evidence links nutritional deficiencies as a contributing factor to chronic diseases such as heart disease, cancer, osteoporosis, Alzheimer's, diabetes and arthritis.**
- **Nutrient deficiencies are common. 90% of people are deficient, and 50% of those people are already taking supplements.**
- **Commonly used prescription medications can cause nutrient depletions.**
- **Patients shouldn't self-medicate with supplements. Over-supplementing can be harmful. Understanding how nutrients correlate with each other is a critical part of a personalized supplement plan.**
- **Knowing what deficiencies exist takes the guesswork out of supplementing.**
- **You might be over supplementing with unnecessary vitamins, minerals or antioxidants. Too much can be harmful.**
- **Spectracell's Micronutrient Testing gives a functional cellular analysis of nutrient deficiencies. This is different from all other nutritional assessments, using t-lymphocytes to not only measure if a nutrient is present but also if the nutrient is being absorbed and properly functioning within the body.**
- **Micronutrient Testing gives a 4-6 month window of nutritional history. It is more than just a snapshot.**

Test Components:

<u>VITAMINS</u>	<u>VITAMINS CONT'D</u>	<u>AMINO ACIDS</u>	<u>ANTIOXIDANTS</u>	<u>IMMUNIDEX™</u>
Vitamin A	Biotin	Asparagine	Alpha Lipoic Acid	<u>Immune Response</u>
Vitamin B1	Folate	Glutamine	Coenzyme Q10	<u>Score</u>
Vitamin B2	Pantothenate	Serine	Cysteine	<u>CARBOHYDRATE</u>
Vitamin B3	<u>MINERALS</u>	<u>FATTY ACIDS</u>	Glutathione	<u>METABOLISM</u>
Vitamin B6	Calcium	Oleic Acid	Selenium	Chromium
Vitamin B12	Magnesium	<u>METABOLITES</u>	Vitamin E	Fructose Sensitivity
Vitamin C	Zinc	Choline	<u>SPECTROX™</u>	Glucose-Insulin
Vitamin D	Copper	Inositol	<u>For Total</u>	Metabolism
Vitamin K	Manganese	Carnitine	<u>Antioxidant Function</u>
